Fusion Joint DataLogger®

DataLogger®

Original Language: English

Manual: DL6501 Revision: Rev E 11/06

Introduction

Thank You for purchasing this McElroy product.

McElroy's third generation DataLogger® system incorporates several new technologies, including the widely available Windows Mobile based Pocket PC and low power Bluetooth® wireless technology. This combination offers the convenience of battery-powered devices without the clutter and breakage-prone problem of wired systems.

The McElroy DataLogger® system consists of a data logging device (called the DataLogger®), a Pocket PC, and optional accessories. The DataLogger® logs and store report for one joint, and then transmit the joint report to the Pocket PC.

In addition to providing a user interface, the Pocket PC is capable of storing hundreds of reports limited only by its memory capacity. For example, a Pocket PC with 20MB of user accessible memory can store up to 10,000 reports that are 2Kbytes in length. (Note: although the Pocket PC has the capacity, you are strongly advised to backup your report data to a Desktop PC or secondary storage device).

Alternatively, a Bluetooth® enabled desktop or notebook computer running Windows XP operating system can be used in place of the Pocket PC as a user interface and report storage device.

NOTICE: Please take every precaution to safeguard your joint reports. If joint reports are critical to your job, please make backups often and print out every joint report at the completion of each joint using the optional printer. McElroy cannot guarantee the safety and integrity of joint reports beyond the specification of component manufacturers and the handling of equipment in the field.

TX02507-6-20-05

World Class Training

This manual is intended as a guide only and does not take the place of proper training by qualified instructors.

The information in this manual is not all inclusive and can not encompass all possible situations that can be encountered during various operations.

McElroy Manufacturing, Inc., offers advanced training classes to enhance efficiency, productivity, safety and quality. Training is available at our facility or on-site at your location. Call (918) 836-8611

Warranty

LIMITED WARRANTY

McElroy Manufacturing, Inc. (McElroy) warrants all products manufactured, sold and repaired by it to be free from defects in materials and workmanship, its obligation under this warranty being limited to repairing or replacing at its factory and new products, within **3 years** after shipment, with the exception of purchased items (such as electronic devices, pumps, switches, etc.), in which case that manufacturer's warranty applies. Warranty applies when returned freight is prepaid and which, upon examination, shall disclose to have been defective. This warranty does not apply to any product or component which has been repaired or altered by anyone other than McElroy or has become damaged due to misuse, negligence or casualty, or has not been operated or maintained according to McElroy's printed instructions and warnings. This warranty is expressly in lieu of all other warranties expressed or implied. The remedies of the Buyer are the exclusive and sole remedies available and Buyer shall not be entitled to receive any incidental or consequential damages. Buyer waives the benefit of any rule that disclaimer of warranty shall be construed against McElroy and agrees that such disclaimers herein shall be construed liberally in favor of McElroy.

RETURN OF GOODS

Buyer agrees not to return goods for any reason except upon the written consent of McElroy obtained in advance of such return, which consent, if given, shall specify the terms and conditions and charges upon which any such return may be made. Materials returned to McElroy, for warranty work, repair, etc., **must have a Return Material Authorization (RMA) number**, and be so noted on the package at time of shipment. For assistance, inquiry shall be directed to:

McElroy Manufacturing, Inc.
P.O. Box 580550
833 North Fulton Street Tulsa, Oklahoma 74158-0550
PHONE: (918) 836-8611, FAX: (918) 831-9285.
EMAIL: fusion@McElroy.com

Note: Certain repairs, warranty work, and inquiries may be directed, at McElroy's discretion, to an authorized service center or distributor.

DISCLAIMER OF LIABILITY

McElroy accepts no responsibility of liability for fusion joints. Operation and maintenance of the product is the responsibility of others. We recommend qualified joining procedures be followed when using McElroy fusion equipment.

McElroy makes no other warranty of any kind whatever, express or implied; and all implied warranties of merchantability and fitness for a particular purpose which exceed the aforesaid obligation are hereby disclaimed by McElroy.

PRODUCT IMPROVEMENT

McElroy reserves the right to make any changes in or improvements on its products without incurring any liability or obligation to update or change previously sold machines and/or the accessories thereto.

INFORMATION DISCLOSED

No information of knowledge heretofore or hereafter disclosed to McElroy in the performance of or in connection with the terms hereof, shall be deemed to be confidential or proprietary, unless otherwise expressly agreed to in writing by McElroy and any such information or knowledge shall be free from restrictions, other than a claim for patent infringement, is part of the consideration hereof.

PROPRIETARY RIGHTS

All proprietary rights pertaining to the equipment or the components of the equipment to be delivered by McElroy hereunder, and all patent rights therein, arising prior to, or in the course of, or as a result of the design or fabrication of the said product, are exclusively the property of McElroy.

LAW APPLICABLE

All sales shall be governed by the Uniform Commercial Code of Oklahoma, U.S.A.

Register your product online to activate your warranty:

Equipment Safety

WR00051-11-30-92

Safety Alerts

This hazard alert sign appears in this manual. When you see this sign, carefully read what it says. YOUR SAFETY IS AT STAKE.

You will see the hazard alert sign with these words: DANGER, WARNING, and CAUTION.

Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

Indicates a hazardous situation which, if not avoided, may result in minor or moderate injury.

In this manual you should look for two other words: **NOTICE** and **IMPORTANT**.

NOTICE: can keep you from doing something that might damage the machine or someone's property. It may also be used to alert against unsafe practices.

IMPORTANT: can help you do a better job or make your job easier in some way.

TX00030-12-1-92

Read and Understand

Do not operate this equipment until you have carefully read, and understand the "Safety" and "Operation" sections of this manual, and all other equipment manuals that will be used with it.

Your safety and the safety of others depends upon care and judgment in the operation of this equipment.

Follow all applicable federal, state, local, and industry specific regulations.

McElroy Manufacturing, Inc. can not anticipate every possible circumstance that might involve a potential hazard. The warnings in this manual and on the machine are therefore not all inclusive. You must satisfy yourself that a procedure, tool, work method, or operating technique is safe for you and others. You should also ensure that the machine will not be damaged or made unsafe by the method of operation or maintenance you choose.

WR00052-12-1-92

TX00031-12-8-92

Equipment Safety

General Safety

Safety is important. Report anything unusual that you notice during set up or operation.

LISTEN for thumps, bumps, rattles, squeals, air leaks, or unusual sounds.

SMELL odors like burning insulation, hot metal, burning rubber, hot oil, or natural gas.

FEEL any changes in the way the equipment operates.

SEE problems with wiring and cables, hydraulic connections, or other equipment.

REPORT anything you see, feel, smell, or hear that is different from what you expect, or that you think may be unsafe.

SAFE1ST12-22-92

TX00114-4-22-93

Wear Safety Equipment

Wear a hard hat, safety shoes, safety glasses, and other applicable personal protective equipment.

Remove jewelry and rings, and do not wear loose-fitting clothing or long hair that could catch on controls or moving machinery.

WRO0053-12-2-92

TX00032-4-7-93

Equipment is Not Explosion Proof

Datalogger[®] equipment is not explosion proof. Operation of equipment in a hazardous environment may result in explosion and death.

Do not operate this equipment in a hazardous environment.

WRO0034-11-30-92

TX01395-6-12-97

Equipment Safety

Units With Hydraulics

Although the hydraulic pressures in this machine are low compared to some hydraulically operated equipment, it is important to remember that a sudden hydraulic oil leak can cause serious injury, or even be fatal if the pressure is high enough.

⚠ WARNING Escaping fluid under pressure can penetrate the skin causing serious injury. Keep hands and body away from pinholes which eject fluid under pressure. Use a piece of cardboard or paper to search for leaks. If any fluid is injected into the skin, it must be immediately removed by a doctor familiar with this type of injury.

NOTICE: Wear safety glasses, and keep face clear of area when bleeding air from hydraulic system to avoid spraying oil into eyes.

WR000784-8-93

TX00110-8-23-95

Fusion Machine Procedures

Familiarize yourself with the fusion machine you will be working with by reading the Manufacturer's manuals for the machine. Read the Safety Information to avoid potentially dangerous situations.

⚠ WARNING Follow the pipe manufacturer's procedures for fusing the pipe being used.

Failure to adhere to proper machine and fusion procedures can result in injury and bad fusion joints.

WR000792-7-96

TX01396-6-12-97

Heater Is Hot

⚠ CAUTION The heater is hot and will burn clothing and skin. Keep the heater in its insulated heater stand or blanket when not in use, and use care when heating the pipe.

NOTICE: Use only a clean non-synthetic cloth such as a cotton cloth to clean the heater plates.

WR000302-10-93

TX00104-8-12-94

The DataLogger®

The DataLogger® is a self-contained unit with its own processing power and sensor electronics. While the DataLogger® communicates with the operator via a Pocket PC, it also has two LED's to provide status and a multifunction switch.

TX02508-6-20-05

Multifunction Switch

- 1) Turns on the DataLogger® if it is off (both LED's off). Once turned on, the DataLogger® will remain on for 2 minutes if there is no communication activity. Otherwise, the DataLogger® will stay on as long as there is communication between it and a PC. Every time this switch is pressed, it adds another 2 minutes to the on time.
- 2) Takes temperature reading if the DataLogger® is on but not in data logging mode. For as long as this switch is held, the temperature will be displayed on the Pocket PC screen.
- 3) Stops logging if the DataLogger® is in data logging mode. This switch must be held for longer than 3 seconds to turn off logging.

Note: the DataLogger® turns itself off, therefore, it does not have an OFF switch.

TX02509-6-20-05

LED Indicators

Blue LED (Bluetooth® Status):

- 1) When power to the DataLogger® is turned on, the Blue LED begins to flash periodically, indicating that the Bluetooth® module is on, and is ready to communicate with a Pocket PC.
- 2) When the Bluetooth® module establishes connection with a Pocket PC and are exchanging data, the Blue LED stays solid.

Tri-color LED:

- 1) Amber: when the DataLogger® is first turned on, this LED stays amber for less than 2 seconds, indicating that the DataLogger® is in power-up initialization state.
- 2) Flashing Green: indicates the DataLogger® is in normal operating mode.
- 3) Flashing Red: indicates the DataLogger® is in data logging mode.

TX02510-6-20-05

Overview

Batteries

The DataLogger® runs on two (2) readily available alkaline D-size batteries. When the low battery indicator on the Pocket PC screen appears, the DataLogger® has less than 2 hours of run time left. The batteries must be replaced as soon as possible when not logging a joint.

The DataLogger® stores joint report in non-volatile memory so that the report will be intact even when batteries are removed for replacement. However, it is not advisable to remove the batteries during data logging. This will cause the logging to be interrupted and the joint report will not be complete. **Replace the batteries only when not logging data.**

TX02511-6-20-05

PH03053-6-24-05

Pressure Transducer

The pressure transducer is connected to the DataLogger® via a cable. The cable can be replaced easily by unscrewing from both ends. The pressure transducer taps into the hydraulic system of a fusion machine via a quick-disconnect. Pressure reading is displayed on the Pocket PC screen as long as the Pocket PC is turned on and communicating with the DataLogger®.

NOTICE: Do not store pressure probe with adapter fitting(s) attached. Stored pressure can damage the transducer.

TX02512-6-20-05

PH03052-6-24-05

Temperature Transducer

The temperature transducer is built in to the DataLogger®. By holding down the DataLogger® button, temperature is displayed on the Pocket PC screen. At the "Heater Temperature" screen, holding the button updates the display, and releasing the button logs the temperature as the current heater temperature.

To take temperature measurement, hold the top of the DataLogger® perpendicular to the heater surface. Press and hold the switch and aim the laser beams at the heater surface. When the two laser beams converge, the proper measurement distance is attained. Hold the switch until the temperature stabilize, and release the switch to lock in the reading.

TX02513-6-20-05

dataLoggerV3

Pocket PC (DL3-PPC)

The software program **McElroy DL3-PPC** runs on the Pocket PC to provide user interface and joint report storage. For redundancy, a Secure Digital card (SD card) is included with every Pocket PC to backup joint reports. At the end of the day or the end of a job, the SD card can be removed from the Pocket PC and data copied to a desktop PC for further archive and processing.

Each Pocket PC is setup at the factory and ready to log data. If a new Pocket PC is acquired, please see the Procedure for **Set-up Pocket PC** section.

Note:

- 1) Like a desktop or notebook PC, the Pocket PC may occasionally lock up and needs a reset. Please refer to the Pocket PC's user manual to locate the Reset button. Push the stylus into the Reset buttonhole for a soft reset of the Pocket PC.
- 2) Like a cell phone, the Pocket PC needs to be on the charger even when not in use so that its built-in program memory content can be retained. This is to prevent having to reinstall and re-setup the Pocket PC, although joint reports and installation programs are backed up in nonvolatile Secure Digital (SD) card.
- 3) In the forth quarter of 2005, the TDS Recon Rugged Pocket PC was introduced to handle harsh environment applications. This Pocket PC has more built-in Flash memory for backing up reports, programs, and settings. In the event of power loss, the TDS Recon automatically restores the previously saved program and settings after confirming with the user.
- 4) In the beginning of year 2006, new HP iPAQ's were introduced. They run Windows Mobile 5.0 operating system with persistent memory, which retains all program and data in the event of a power loss, avoiding the need to reinstall programs and settings as in the case of the rx3115 that runs Pocket PC 2003.
- 5) In the forth quarter of 2006, the Recon X was introduced.

PH03054-6-24-05

Installation

Connecting To A Fusion Machine

NOTICE: The fusion machine must have a hydraulic quick disconnect for connecting the DataLogger[®] pressure transducer. If the machine does not have one, contact your distributor for the proper adapter or retrofit kit.

PH03026-4-13-05

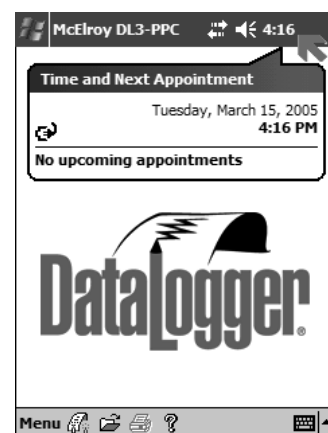

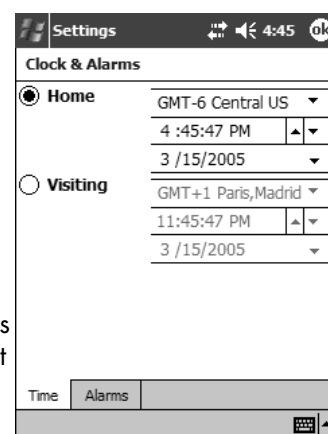

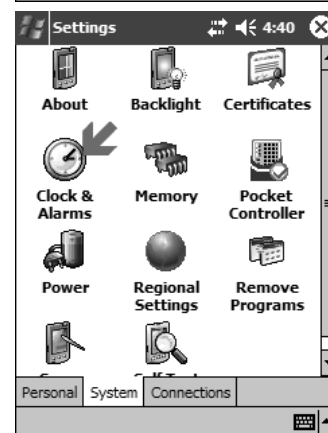

Setting Time and Date

It is very important to set the correct time and date because joint reports are time stamped using the Pocket PC's clock.

1. Tap **Start > Settings**
2. Tap the **System** tab
3. Tap **Clock & Alarms**

4. Select the respective time and date field by tapping on it and adjust the values accordingly. For example to change the hour field, tap on it and then use the up and down arrow keys to adjust the number up or down.

Note: it is important to check the clock often to make sure the time and date are set correctly by tapping the time displayed at the top right hand corner. The **Time and Next Appointment** dialog will show the current date and time. Check to make sure it is set correctly. If not, follow the instructions above and the user manual to set the correct date and time.

Turn on Pocket PC Bluetooth® Radio

Make sure the Bluetooth® radio is turned on. Indicators are available to show the status of the Bluetooth® radio if it is turned on. On an HP iPAQ rx3115 Pocket PC, the Blue LED on the top left corner is lit and the wireless icon at the lower right corner of the screen appears without a red X.

To turn on Bluetooth® radio on the HP iPAQ rx3115, tap Start > iPAQ Wireless.

PH02923-3-11-05

Tap on the Bluetooth® to turn it on:

PH02911-3-11-05

The Bluetooth® icon turns green and the X is removed to indicate the radio is on:

PH02922-3-11-05

Tap the OK button at the top right corner to exit iPAQ Wireless setup.

Note: This step only shows how to turn on the Bluetooth® in case it was turned off. For Bluetooth® setup, please refer to the **Procedure for Setting up a new Pocket PC** section for Bluetooth® port configuration.

Starting the McElroy DL3-PPC Program

To start the program for the first time, tap **Start > Programs** to reveal the program folder, and then scroll down to find the McElroy DL3-PPC program:

Subsequently, the program can be accessed in the Start Menu by tapping **Start > McElroy DL3-PPC**:

Program Menu and Icons

The McElroy DL3-PPC program starts by displaying the Datalogger® logo screen.

Tap **Menu** to reveal the menu items:

Log/Status: opens the dialog for communicating with the Datalogger®, setting up joint information for logging a fusion process, and monitoring status.

Open...: opens a joint report of a previously logged joint and display it on the screen for viewing and printing.

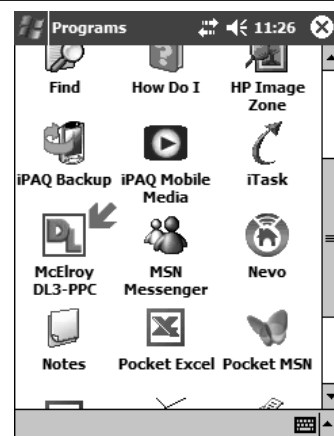

Print...: print the currently displayed joint report. Optional printer required for this feature.

About McElroy DL3...: Displays program copyright and version information.

Exit: Close and exit DL3-PPC Program. Always exit programs before inserting and removing SD card.

Keyboard: reveals/hides the on screen keyboard used for data entry.

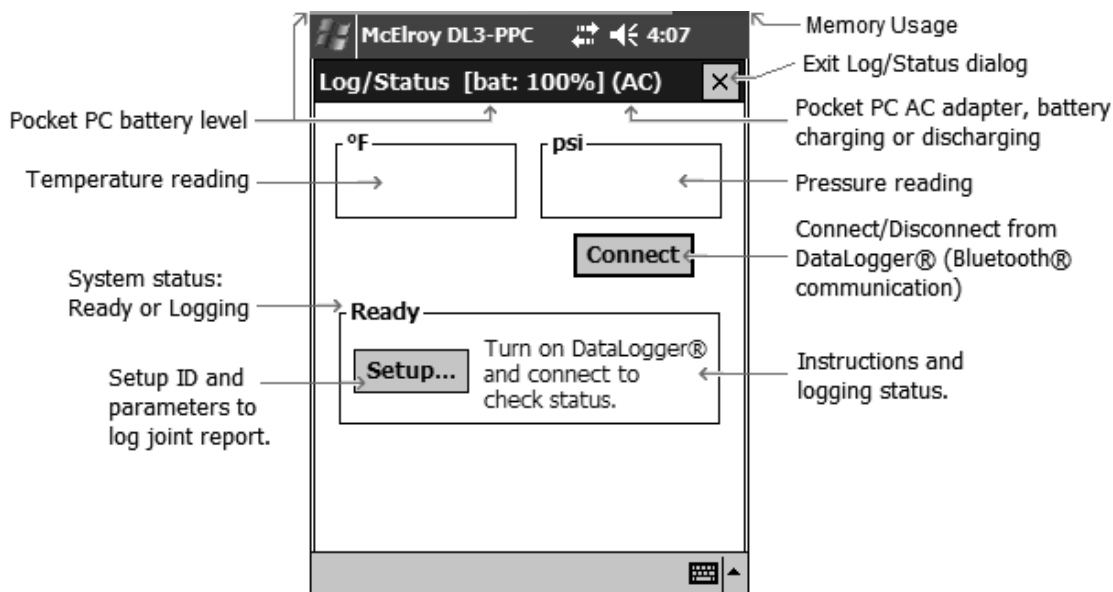

TX02518-6-20-05

The Log/Status Dialog Box

Tap the **Log/Status...** icon or menu item to open the Log/Status dialog box. This dialog box provides status information including Pocket PC battery level, DataLogger® battery status, pressure transducer and temperature readings, and logging status.

Turn on the DataLogger® by pressing and releasing the switch on the unit once. (Note: the DataLogger® will turn off automatically when not active for over 2 minutes. Inactivity means not communicating with the Pocket PC and not logging)

PH02928-3-14-05

Tap the **Connect** button to initiate connection with the DataLogger®. A message box appears as a reminder to turn on the DataLogger® before continuing:

The Log/Status Dialog Box (cont'd)

After making sure the DataLogger® is turned on (by pressing and releasing the switch), tap OK to connect. The Bluetooth Console appears, and the Bluetooth® icon on the top right corner begins to spin, indicating that Pocket PC is searching for a Bluetooth® device. Wait for the Bluetooth® icon to disappear, which indicates all nearby Bluetooth® devices are found. Look for a device icon whose name starts with "MDL3". Compare that name with the name written on the DataLogger® label. If it matches, tap the corresponding icon to connect to that device.

If the DataLogger® you are trying to connect is not on the list, press and release the switch on the DataLogger® to make sure it is turned on. Then tap the "refresh icon" on the Bluetooth® Console to scan again.

Once connected, the dialog box starts displaying pressure reading and the DataLogger® name and firmware version number, and the **Connect** button changes to **Disconnect**:

Temperature reading is only updated when the DataLogger® switch is held down. Otherwise, it displays ---. If there is an error due to hardware failure or out-of-range readings, the temperature field displays **ERR**.

Pressure reading is updated constantly as long as the DataLogger® is connected. If there is an error due to hardware failure or out-of-range readings, the pressure field displays **ERR**.

If the D-size batteries in the DataLogger® are low, the **[BAT!]** indicator is displayed next to the pressure unit (psi in this example). It is best to change batteries at your earliest convenience.

To disconnect from the DataLogger®, tap **Disconnect**. You may turn off the Pocket PC to conserve power. The DataLogger® will automatically turn off after 2 minutes of inactivity.

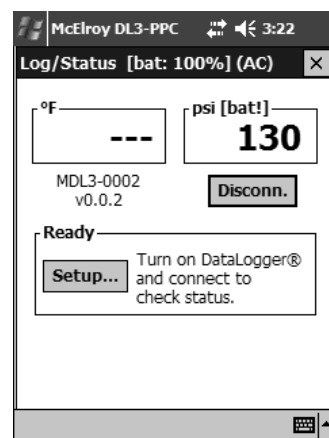

NOTICE: Please do not turn off the Pocket PC while it is connected to the DataLogger®. It may cause the Pocket PC to lock up. In that case, simply reset the Pocket PC by pushing the style into the reset hole.

PH02929-3-14-05

PH02930-3-14-05

PH02931-3-14-05

Setting up to Log a Joint

Operator and Joint information can be entered with or without a connection to the DataLogger®. In the **Log/Status** dialog box, tap **Setup...** to begin entering information for the next joint. A series of dialog boxes will prompt you to enter the information one step at a time, beginning with the **Machine** dialog box:

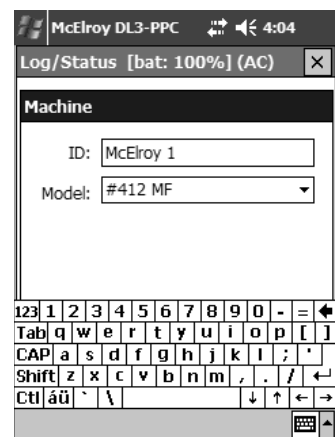

To enter new text or edit the Machine ID text field, tap the keyboard icon at the lower right corner to bring up the on screen keyboard:

Tap in the field where new text is to be entered or change, and tap in new text using the on screen keyboard. The machine ID is a 20-character field that accepts alphabets and numeric characters. When done, tap the keyboard icon to remove the on screen keyboard.

To select a new machine model, tap the down arrow icon and scroll to select a machine from the list:

Setting up to Log a Joint (cont'd)

Once the DataLogger® is found, tap on the name that starts with "MDL3" to establish connection. The blue LED on the DataLogger® will stay lit to indication communication between the DataLogger® and the Pocket PC.

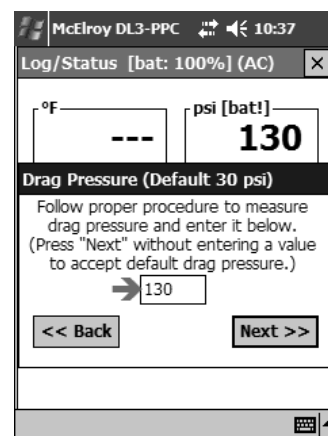

The next dialog box prompts for Drag pressure measured:

The DataLogger® pressure transducer must have already been connected to the fusion machine to measure drag pressure. Follow proper procedure to measure drag pressure and enter it in the dialog box.

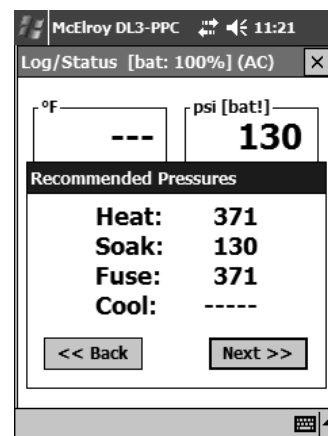

The next dialog box shows the recommended gauge pressures, and you can use it to set the various pressures (heat, soak, and fuse pressure) of your fusion machine:

The next dialog box prompts for heater temperature measurement.

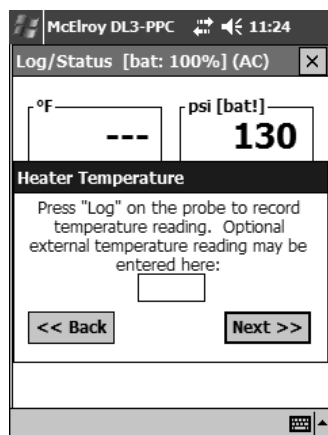

To measure heater temperature, hold the top of the DataLogger® about 4 inches from the heater plate and perpendicular to the heater plate, pointing the temperature sensor at the heater plate. Press and hold the DataLogger® switch to turn on the guidance lasers. Adjust the distance between the DataLogger® and the heater plate until the two laser beams converge to a single point. Use the Pocket PC screen to read the temperature.

PH02941-3-1405

PH02942-3-1405

PH02943-3-1405

Setting up to Log a Joint (cont'd)

The Datalogger® reads the temperature in a 2 inch area around the points of the lasers. Make sure you take the reading from an area that has no obstructions. Make sure the 2 inch area is completely on the heating surface of the heater.

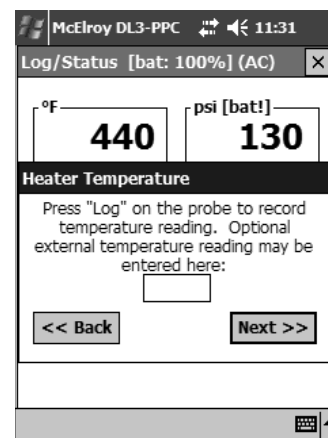

Once the temperature is stable, release the Datalogger® multi-function switch to record the temperature. Notice the temperature box flashes "*** Log XXX°F**" to indicate recorded temperature.

If an external temperature probe is used as a secondary temperature-measuring device (such as a pyrometer), the reading from the device can be entered in the optional "external temperature reading" field.

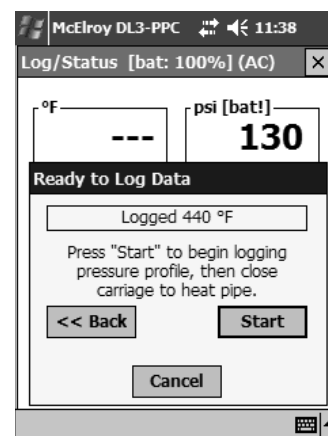

The next dialog box prompts you to get ready to fuse the pipe:

At this point, the fusion machine should have pipe installed in it, faced off, and heater install and ready to fuse pipe.

If ready to proceed, tap **Start** and wait for the Datalogger® to begin logging before initiating the fusion process.

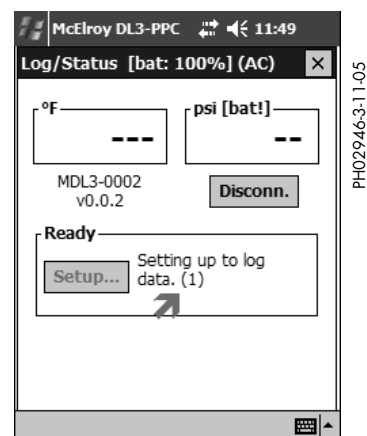

PH02944-3-14-05

PH02945-3-14-05

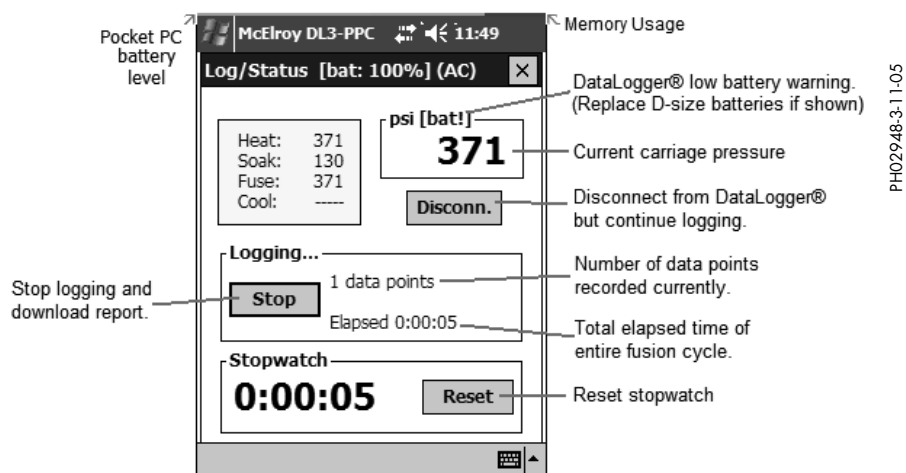

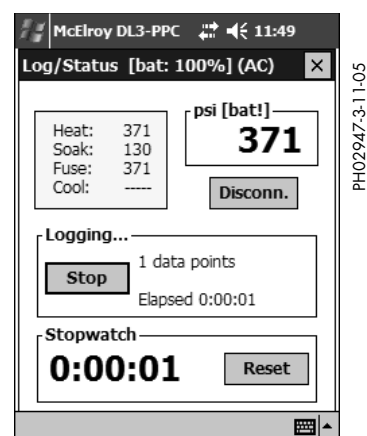

Logging the Fusion Process

After taping the **Start** button on the Pocket PC to log data, the Pocket PC transmit all the data entered to the DataLogger®. You will see a screen such as:

This screen and subsequent ones show the data blocks that are transmitted to the DataLogger®. Once the data is transmitted, the stopwatch appears at the bottom of the dialog box:

At this point, you may proceed to close the carriage to move the pipes towards the heater plate. The stopwatch will continue to count, and the status updated. The DataLogger® will flash it's red LED to indicate it is in logging mode.

Logging the Fusion Process (cont'd)

Once logging has started, you may exit the Log/Status dialog box, and turn off the Pocket PC to conserve battery power. The DataLogger® will continue to log data while you monitor and control the fusion process – heat, soak, fuse cycles.

At the end of the fusion process, you may stop logging by holding the DataLogger® switch for 4 seconds. The DataLogger® will stop logging and stop flashing its red LED. The LED will now flash green to indicate normal operation.

Note: always stop logging before opening carriage to remove pipe. Otherwise, it will introduce an unintended change in pressure at the end of the joint report graph.

Alternatively, you may also stop logging from your Pocket PC. If the Pocket PC was turned off, turn it on. In the **Log/Status** dialog box tap **Connect**. Once connected, the current status of the DataLogger® is displayed:

Tap **Stop** at the end of the fusion process. (Always make sure to stop logging before opening carriage to remove pipe)

A confirmation message box appears. Tap **Yes** to stop logging.

The Pocket PC begins to request joint report data from the DataLogger® a block at a time until it is all downloaded.

PH02951.3-14-04

PH02952.3-14-05

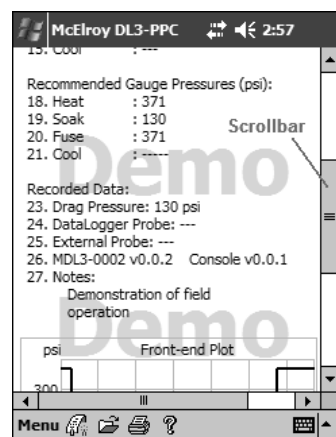

Logging the Fusion Process (cont'd)

At the end of the download, the joint report is displayed on the screen:

PH029533-1405

You may use the scroll bar to scroll through the report:

PH029543-1405

The front-end plot highlights the critical shift-sequence into the soak cycle. The summary plot shows the entire fusion process from start to stop. **(Note: this is only a demonstration. Data used are fictitious and for demonstration purposes only)**

PH029553-1405

Operation

Printing Reports (Optional)

Joint reports are stored in duplicates, one copy in the Pocket PC's main memory (battery backed up), and another copy in the Secure Digital (SD) Card (non-volatile memory). For additional backup, reports can be printed to an optional printer in the field after the completion of each joint - **highly recommended for jobs requiring joint reports.**

To print the current report, simply tap the printer icon at the bottom of the screen, or tap **Menu > Print...** A message box prompts you to turn on the optional printer:

Turn on the printer and tap **Yes** to show the printer dialog box. Make sure the following settings are selected then tap **Start Printing**.

The Bluetooth® Console appears to allow printer selection. If no printer is present, tap the Refresh icon and wait for the Bluetooth icon on the upper right corner. Select the EXTECH printer you are printing to by tapping it.

Once selected, a series of message boxes will appear giving the status of the printer, and the printer will start printing:

PH029563-1405

PH029573-1405

PH029583-1405

PH029593-1405

PH029603-1405

PH029613-1405

TX02522-6-20-05

Sample Joint Report Graphs

The appearance of joint reports varies due to several factors, but their basic profile resembles the following samples:

Typical fusion process:

PH02962-3-14-05

Possible incorrect shift sequence:

The carriage pressure was not lowered to drag pressure before the directional valve is put in neutral, thereby trapping high pressure in the carriage during soak cycle:

PH02963-3-14-05

Possible fuse pressure interrupted:

Carriage pressure interrupted during the fuse or cool cycle showing a temporary dip in pressure.

PH02964-3-14-05

Transferring Joint Reports to PC

Joint Reports stored in the Pocket PC's memory and SD Card can be transferred to a Desktop PC for additional storage. There are two ways to transfer joint reports. One is using an SD card reader, and the other is using Microsoft ActiveSync.

Transferring with SD Card Reader

- 1) Connect the SD card reader to your Desktop PC's USB port. If this is the first time the SD card reader is inserted, your Desktop PC may begin an initialization process that could take a minute or two.
- 2) Exit DL3-PPC program: Tap **Menu > Exit**. (Note: Always exit program before inserting or removing SD card.)
- 3) Remove the SD card from the Pocket PC by depressing the SD card and allow it to pop out of the Pocket PC.
- 4) Insert the SD card in the SD card reader.
- 5) Windows Explorer opens and displays the content of the SD card. Navigate to the **Joint Reports** folder
- 6) For convenience, please copy the **Joint Reports** folder to your **My Documents** folder on your Desktop PC by dragging the report folder from the SD card folder into the Desktop PC's **My Documents** folder.

After making sure the reports are backed up, report files on the SD card can be deleted to make more room on the card. Alternatively, the SD card can be archived without deleting the reports, and a new SD card can be used to store new data.

Transferring with Microsoft ActiveSync

- 1) If not yet installed, please install Microsoft ActiveSync before proceeding. Follow the instructions provided by Microsoft to install the ActiveSync software on your Desktop PC before plugging in the USB Sync Cable.
- 2) With care, connect the Pocket PC to the USB cable or cradle.
- 3) Skip partnership between your Desktop PC and the Pocket PC via ActiveSync to connect as guest, click on the Explore button on the ActiveSync window.
- 4) The "Mobile Device" window opens and you will see a "Joint Reports" folder. You may copy the entire folder over to your PC by drag-and-drop. For convenience, please copy the folder to your **My Documents** folder on your Desktop PC. Once the reports are securely backed up on your Desktop PC, you may delete the files in the **"Joint Reports"** folder.
- 5) In the case of HP iPAQ's there is another copy of reports in the SD Card. To access reports in the SD card, double click on **My Pocket PC**. Find a folder called **Storage Card** or **SD Card**. Double click on it to reveal the **Joint Reports** folder. Reports in this folder are identical to the Pocket PC version since it is a backup. You may copy and then delete the reports in the folder.
- 6) In the case of TDS Recon, reports are stored in the "Built-in Storage" non-volatile memory area. Only one copy of the report is stored.

NOTE: The Pocket PC and SD card have large enough capacity to store thousands of joint reports. However, it is advisable to backup your data as frequently as you can to avoid losing data.

DX3-XP: Viewing and Printing Reports on the Desktop PC

The software DL3-XP allows you to view and print joint reports on your Desktop PC.

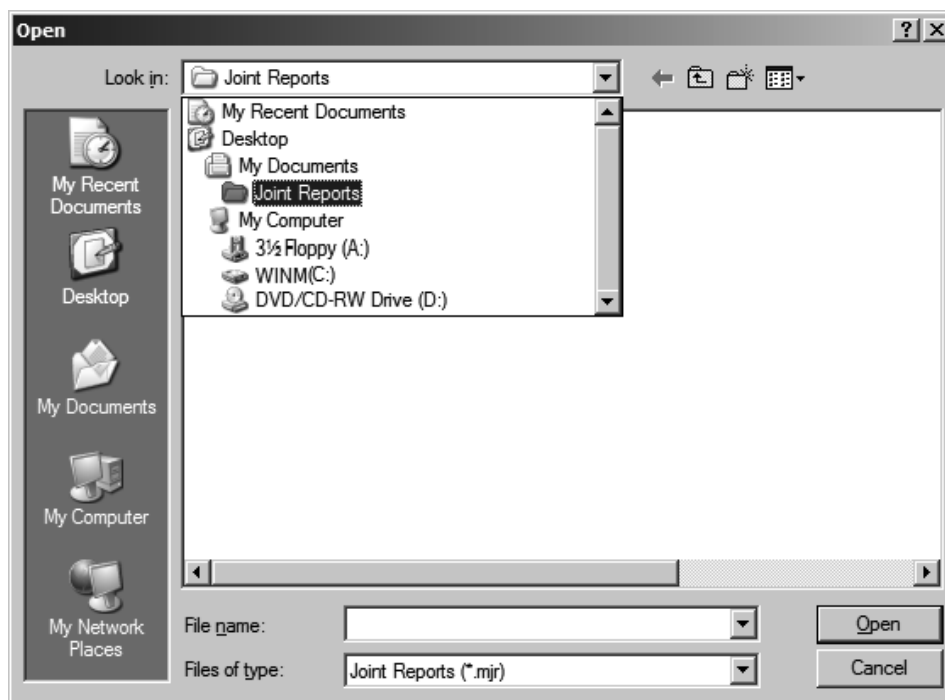

Install DL3-XP on your PC with the accompanying SD Card if not already installed. To install, place the SD card in the SD Card reader and connect the reader to an available USB port on your PC. A window will open and shows the content of the SD Card. If the Window does not open, use Windows Explorer to navigate to the SD Card. Double click the "XP Setup Files" folder to open it. Double click "Setup".

Follow the prompts on the PC screen to complete the installation process. Once installed, the DL3-XP icon appears on your PC's desktop. To run the program, simply click on the desktop icon or click **Start > Programs > McElroy > DL3-XP > DL3-XP**.

To view reports on your PC screen, click **File > Open**. Navigate to the **Joint Reports** folder and select a previously downloaded report:

TX02525-6-20-05

PH029653-1405

DL3-XP Menu

File > Log/Status...

Opens the Log/Status dialog box to allow Bluetooth®-equipped Windows XP PC's to monitor the status of the DataLogger® or set it up to log data. Refer to The **Log/Status** Dialog Box section for details on setting up to log the fusion process.

File > Open...

Opens a previously downloaded or saved file for viewing and printing.

File > Print...

Prints the joint report in the current view.

File > Print Preview

Preview the print version of the joint report in the current view.

File > Print Setup...

Select a printer and a printer connection. This command presents a Print Setup dialog box, where you specify the printer and its connection.

File > Print Many...

Print one or more joint reports. A file dialog box will open and you may select one, a few or all joint reports within a folder to be printed.

To select a group of joint reports in series, click the first joint reports you want to print, then hold down the **Shift** key and click the last joint report you want to print. When you release the mouse button, the select joint reports will be highlighted.

To select a group of joint reports while skipping others, click on the first joint report you want to print, then hold down the **Ctrl** key and click on the joint reports you want to print one at a time. Release the **Ctrl** key only after the last report is selected. Selected reports are highlighted.

Click **Open** to print the selected reports.

File > Send

Send (email) the joint report in the current view. This command presents a mail window with the displayed joint report attached to it. You may then fill out the **To** field, **Subject** field, etc., and add text to the body of the message if you wish. When you are finished you may click the **"Send"** button to send the message.

File > Settings...

Change program settings such as COM port, pressure unit, temperature unit, and toggle demo mode.

Restoring Pocket PC Programs and Settings for iPAQ rx3115

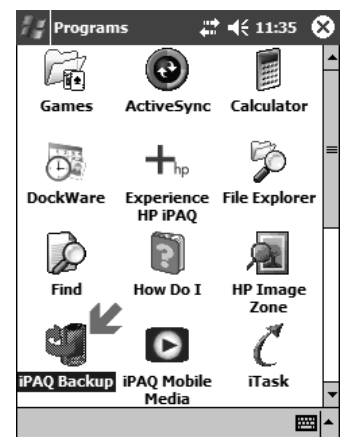

Programs and settings in the older Pocket PC (**iPAQ rx3115**) can be lost if the Pocket PC batteries are not charged. However, a McElroy -supplied Pocket PC comes with a copy of programs and settings stored in the non-volatile Flash memory (iPAQ File Store), and the Pocket PC can be restored.

Follow these steps to restore the Pocket PC:

1. Make sure the Pocket PC's battery is fully charged, or the AC adapter is attached and charging the battery.
2. Turn on the Pocket PC and follow the prompts to align the screen and complete the usage tutorial, and select your time zone. (If the Pocket PC fails to come on, attach the AC adapter)
3. Set date and time: Tap **Start > Settings**. Tap the **System** tab. Tap **Clock & Alarms**. Select the respective time and date field by tapping on it and adjust the values accordingly. For example to change the hour field, tap on it and then use the up and down arrow keys to adjust the number up or down. [For more details, refer to the **Setting Time and Date** section to check and set the correct date and time.

IMPORTANT: Set the correct time and date because joint reports are time stamped using the Pocket PC's clock.]

4. Tap **Start > Programs > iPAQ Backup** (or equivalent).
5. If there are no backup stored other then the default McElroy factory default, then click **Restore Now** and wait until the restore is complete.
6. Wait...

PH030164-13:05

PH030174-13:05

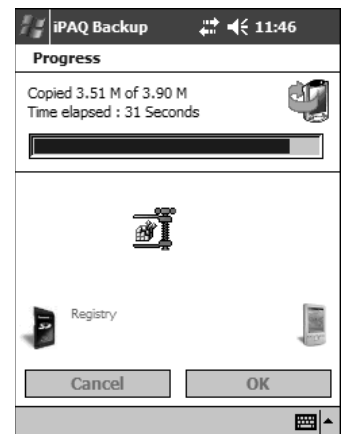

Restoring Pocket PC Programs and Settings

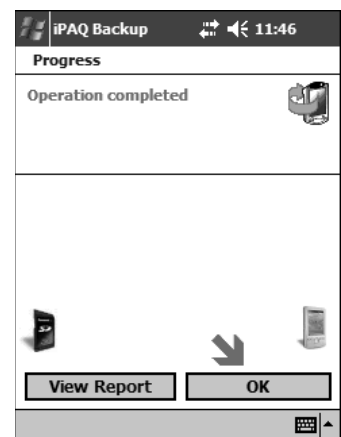

Restoring Pocket PC Programs and Settings (cont'd)

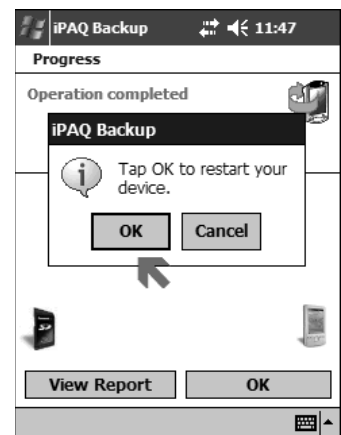

7. Wait...

8. Tab OK to continue.

9. Tab OK to restart.
After the restart, your Pocket PC is ready for use.

Procedure for Setting up a new Pocket PC

Note: This section is for setting up a brand new Pocket PC not supplied by McElroy, for instance a store-bought unit replacing a damaged McElroy supplied Pocket PC. To restore a McElroy provided Pocket PC, please refer to the **Restore Pocket PC** section. Restoration is required if the Pocket PC battery is left uncharged for long periods of time causing loss of program and settings.

For basic operation of the Pocket PC, please refer to the documentation that came with the Pocket PC.

The instructions and references given below are based on the **HP iPAQ rx3115** Pocket PC, but most features are common to all Pocket PC's.

Notes for the HP iPAQ rx3115 and Pocket PC with DockWare and iPAQ Entertainment buttons:

- 1) The rx3115 comes with DockWare, a personalized desktop clock, calendar and screen saver. It may come on after 5 minutes of inactivity. To disable the feature, tap **Start > Programs > Dock Ware**. When the picture and/or calendar appear, hold the style on the screen until a menu shows up. Uncheck the **Start Automatically**. Tap anywhere on the picture or calendar to exit DockWare.
- 2) The rx3115 also comes standard with the iPAQ Entertainment buttons on the main (or Today) screen. To disable the feature, tap **Start > Settings > Today**, tap **Items**, uncheck **iPAQ Entertainment**, and tap **OK**. Tap **X** to return to the main screen.

- 1) Follow the instruction in our Pocket PC manual or user guide to set time and date or refer to the **Setting Time and Date** section.

IMPORTANT: Joint reports are time stamped using the Pocket PC's clock.

- 2) Insert the DL3-PPC Setup SD Card into Pocket PC

PH02905-3-11-05

- 3) Tap on Start to bring up the main menu.

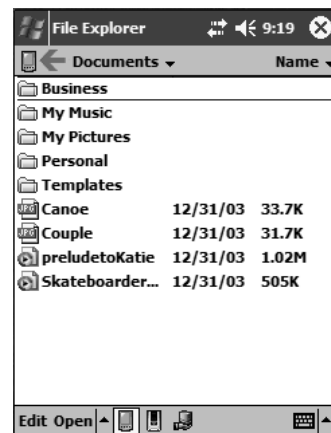

PH02906-3-11-05

Procedure for Setting up a new Pocket PC (cont'd)

4) Install Application

- A) Tap **Programs** tab > **File Explorer**.
- B) Tap on the Pocket PC icon next to **My Documents** (as shown by the red arrow).
- C) When the drop down menu appears, tap on **My Device**.
- D) Tap **SD Card** or **Storage Card**.
- E) Tap on the **PPC Setup Files** folder.
- F) Tap **DL3-PPC Setup** to install the program.

5) The setup program will run automatically and displays progress reports along the way

- 6) After returning to File Explorer, tap on **PrinterCE 2003** to install the optional Extech printer driver.
- 7) If this message appears, simply tap **OK** to complete the installation.
- 8) Tap on the **X** at the top right hand corner of **File Explorer** to close the view. Tap the next **X** at the top right hand corner of **Programs** to close the view.

Procedure for Setting up a new Pocket PC (cont'd)

- 9) Refer to the Pocket PC's manual to make sure Bluetooth is turned on.
In the case of iPAQ rx3115, Bluetooth can be turned on by accessing the **iPAQ Wireless** feature from the **Start** menu, or from the icon at the lower right hand corner of the main (or **Today**) screen.

If the tutorial screen appears, tap **X** to exit from it.

Tap on the **Bluetooth** icon (as shown by the arrow) to turn it on.

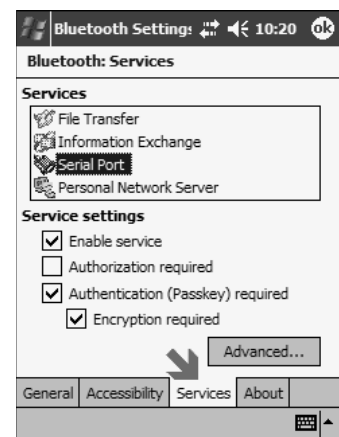

Wait for the button to turn green indicating it is on.

Tap on **Settings** button.

PH029113-11-05

- 10) Tap on **Services** in Bluetooth Settings.
Tap on **Serial Port**.
Tap **Advanced...**

PH029123-11-05

- 11) Note the **Outbound COM Port** in **Bluetooth Serial Port Settings**. It will be used in the DL3-PPC program setting.

- 12) Tap **OK** to exit **Bluetooth Serial Port Settings**.
Tap **OK** to exit **Bluetooth Services**.
Tap **OK** to exit **iPAQ Wireless**.

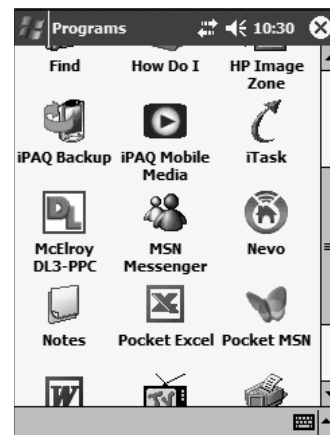

PH029133-11-05

Procedure for Setting up a new Pocket PC (cont'd)

- 13) Tap **Start > Programs**.

Scroll down the list of icons to locate the **McElroy DL3-PPC** program icon.

Tap on the **McElroy DL3-PPC** icon to run the program.

PH029143-11-05

PH029153-11-05

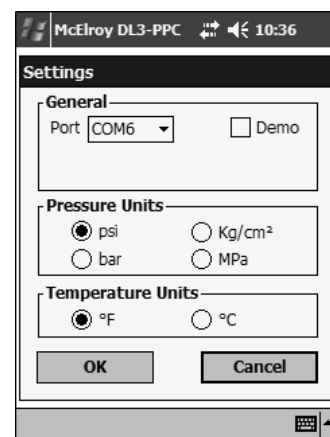

- 14) Tap **Menu > Settings**.

Make sure the **Port** setting matches the **Outbound COM Port** in step 11.

Pressure and temperature units can also be changed at this time.

The **Demo** check box sets the unit in demo mode for training and testing purposes only.

Tap **OK** to save the settings and exit the **Settings** dialog box.

PH029163-11-05

Procedure for Setting up a new Pocket PC (cont'd)

- 15) Tap **Menu > Exit** to completely exit the **DL3-PPC** program.
Tap **X** at the top right hand corner of Programs to close it.
- Note:** from this point on, the **McElroy DL3-PPC** program icon appears in the **Start** menu, and can be accessed by tapping **Start** and selected from the icon.

- 16) At this point, the Pocket PC setup is complete.
The next steps create a backup of all the programs and settings for rapid recovery in case the unit's batteries drained completely.

- 17) Tap **Start > Programs > iPAQ Backup** (or equivalent) to create a backup.
Tap **Options** and Switch to **Advanced Mode**.
Wait for the file system scan.
- In the case of the rx3115, tap the ... button to open the **Save As** dialog box.
Select **iPAQ File Store** (or equivalent) to store the backup. [Note: the SD card can also be used for backup, but storing backup on the unit itself makes restoring easier. Alternatively, a second backup copy can be stored on the SD card]
Tap **OK**.

- 18) Tap **Backup...**
Tap **Start**.
The Progress screen appears.
Wait for the **Operation Complete** message and tap **OK**.
The rx3115 backup requires the unit to be reset. Tap **OK**.

PH029203-11-05

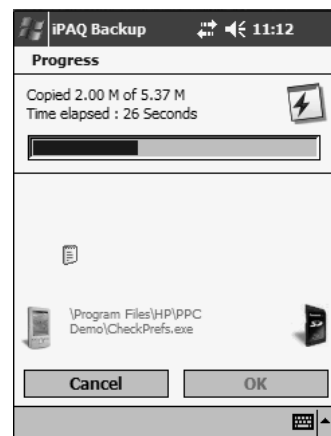

- 19) The rx3115 will reset and be ready for use.
The entire production setup process is now complete.

PH029193-11-05

Set-up Recon X

Setup Instructions for DL3 Recon X

IMPORTANT: Applying an image restoration deletes all Joint Reports and return the Recon X to factory settings. For software updates, use the update instructions in section "Section."

This setup provides instructions for setting up the Recon X:

- Getting the setup image file from the Internet
- Set Recon X Date and Time
- Transferring the image file (RecXimg) onto the Recon X [factory setting]
- Setting up the Bluetooth® Radio
- Installing Printer Port (optional)
- Software Update

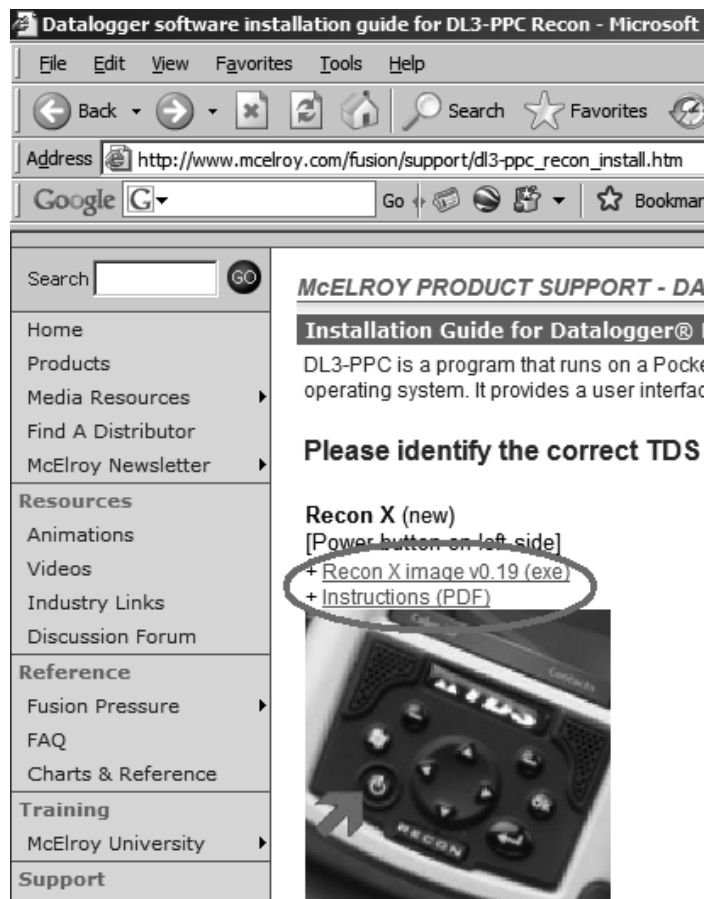

NOTE: The Recon X uses Microsoft's Bluetooth Stack, which requires a different communications partnership and COM port for every DataLogger and printer. Deleting an existing partnership is simple; simply hold down on the DataLogger icon in the Bluetooth screen and tap "Delete". Setting up a new partnership is easy too; simply follow the instructions in section "Section."

TX02671-10-31-06

Getting the Setup Image File from the Internet

The setup files and this manual can be downloaded from
http://www.mcelroy.com/fusion/support/dl3-ppc_recon_install.htm

Click on **Recon X image (exe)**

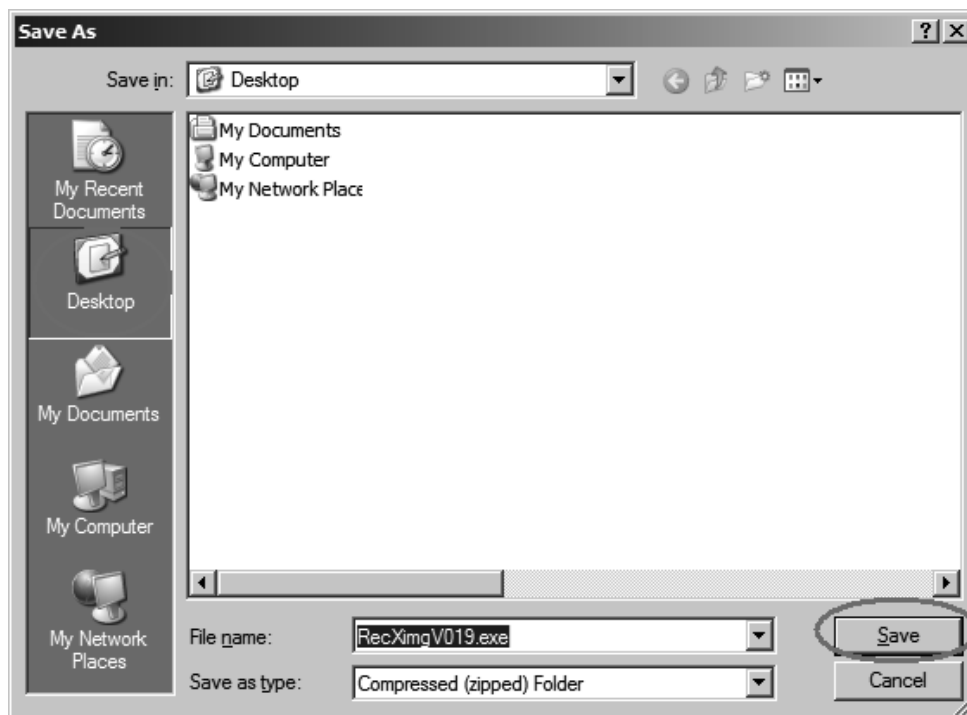

PH03348-102406

Getting the Setup Image File from the Internet (cont'd)

Click **Save**:

Choose to save it on your Desktop and click **Save**:

After downloading, you should see an icon on your desktop:

Set-up Recon X

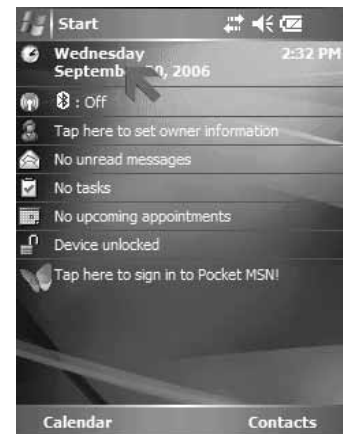

Set Recon X Date and Time

NOTE: Tap **Start > Today** to reveal the Today screen.
Tap the **time and date** field.

Tap on the **keyboard symbol** to bring up the on screen keyboard.

Tap the individual time and date fields to change them. Finally, tap **OK** (top right corner of screen) and tap **Yes** to save changes.

Set-up Recon X

Transferring the Image File (RecXimg.exe) onto the Recon X (factory setting)

The Recon X is environmentally sealed, therefore, programming and setting up the Recon X is through its USB port using Microsoft ActiveSync 4.2 or higher.

NOTE: Please make sure Microsoft ActiveSync is installed on your Desktop or Notebook PC before proceeding. This is a one-time-only setup on the Desktop PC. ActiveSync can be downloaded from:

http://www.microsoft.com/windowsmobile/downloads/activesync42.mspx

With ActiveSync installed, follow these instructions to setup the Recon X:

Make sure the Recon X is fully charged or have the AC adapter plugged in during the setup. Turn on the Recon X. For brand new units from the factory, follow the on screen setup instruction. On the Password screen, tap the on screen **Skip** button since password protection is not required.

NOTE: If returning to factory default setting is desired, hold the power button down for 5 seconds, and on hearing the beep, press both the **OK** and Windows (⊞) buttons simultaneously.

NOTICE: this will erase all programs and data.

Connect the USB cable between the PC and the Recon X. Wait for the PC to find the Recon X hardware and allow time for the ActiveSync program to load.

ActiveSync displays the Synchronization Setup Wizard. Click **Cancel**.

Transferring the Image File (RecXimg.exe) onto the Recon X (factory setting) (cont'd)

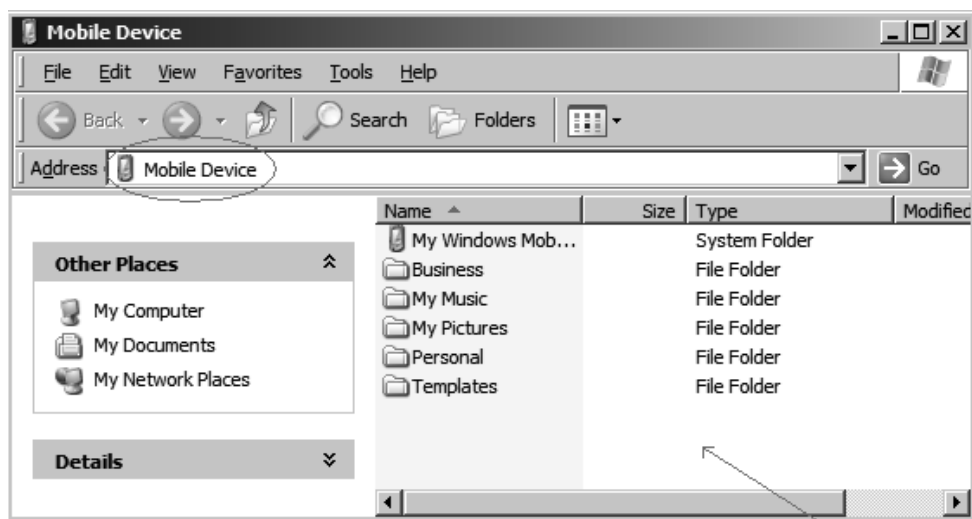

Microsoft ActiveSync activates and is connected to the Recon X as below. Click **Explore**.

PH03356-10-24-06

An Explorer window appears showing the folder below.

On the Desktop PC, drag the **RecXimg.exe** file icon from the desktop to the Mobile Device folder as shown.

PH03357-10-24-06

Click **OK** on the message below:

PH03358-10-24-06

Transferring the Image File (RecXimg.exe) onto the Recon X (factory setting) (cont'd)

Wait for the files to be copied.

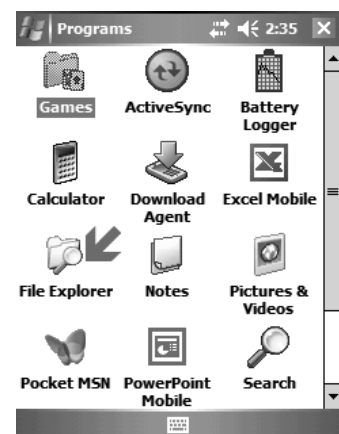

Bring up File Explorer to locate the installation program:

Tap **Start** then **Programs**.

Tap **File Explorer**.

Set-up Recon X

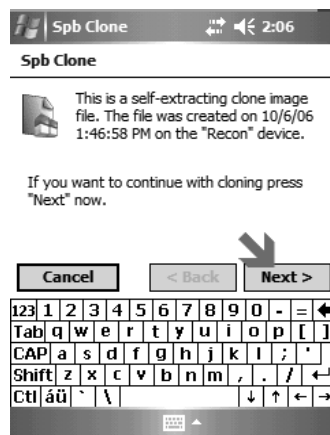

Transferring the Image File (RecXimg.exe) onto the Recon X (factory setting) (cont'd)

In Folder Explorer, navigate to the installation program.

Tap **RecXimg**.

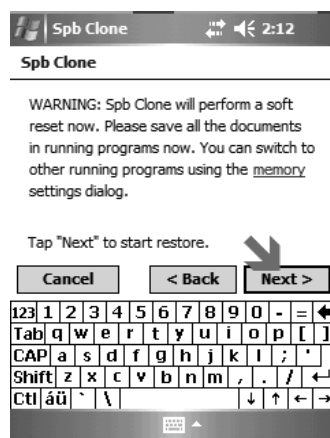

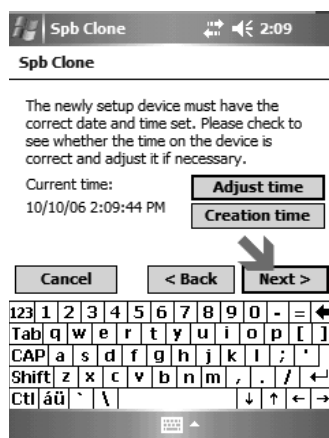

Tap **Next** to Continue.

Follow the on screen instructions to install the image on the Recon X:

Check to make sure the date and time are correct. If adjustment is needed, tap **Adjust time**. Otherwise, tap **Next**.

Tap **Next** to start restoring image.

The Recon X will perform a soft reset and begin the restore process. The screen may turn dark for 15 seconds. Watch the screen for progress. The entire process takes about a few minutes.

At the end of a successful image restore, the McElroy DataLogger® screen is displayed:

Setting up the Bluetooth® Radio

Go to the Today screen by tapping **Start > Today**.

At the Today screen tap the **Bluetooth** icon

Tap **Bluetooth** to turn it on

Setup Bluetooth

Make sure Bluetooth is **On** then tap **Menu**

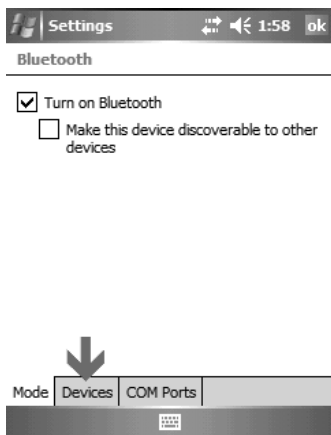

Tap **Bluetooth Settings**

Select Bluetooth device. (DataLogger must be turned on for this step)

Tap **Devices**

Turn on DataLogger and tap **New Partnership**

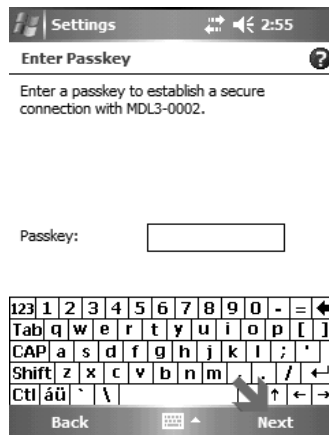

Setting up the Bluetooth® Radio (cont'd)

Wait for Bluetooth devices to be found, and then select it
Select the corresponding DataLogger MDL3 and then tap **Next**
Tap **Next**

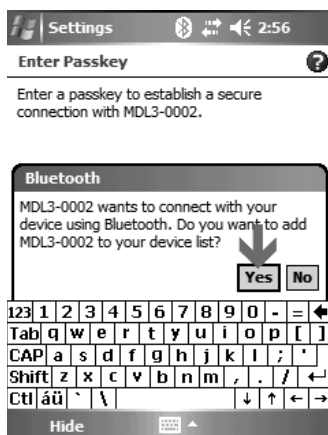

PH03373-10-24-06

PH03374-10-24-06

Accept partnership and service.
Tap **Yes** to accept partnership.

PH03375-10-24-06

PH03376-10-24-06

Setup COM port
Select MDL3 and tap **COM Ports**
Tap on **New Outgoing Port**

PH03377-10-24-06

Setting up the Bluetooth® Radio (cont'd)

Bind device to COM port

Tap **Next**

Select **COM8**, uncheck **Secure Connection**, and tap **Finish**.

Confirm Bluetooth selection

Tap **OK** to complete Bluetooth setup

Tap **X** to exit Bluetooth setting

Access McElroy DL3-PPC program

Tap **Start**

Tap **McElroy DL3-PPC**

Set-up Recon X

Setting up the Bluetooth® Radio (cont'd)

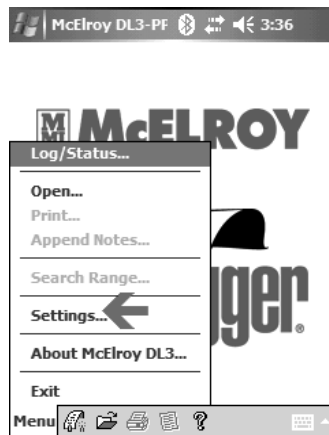

Setup McElroy DL3-PPC

Tap **Menu**

Tap **Settings...**

PH03385-10-24-06

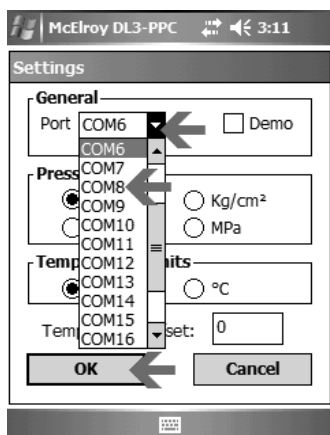

PH03386-10-24-06

Setup program COM port

Select **COM8** and tap **OK**

Tap **Log/Status** icon

PH03387-10-24-06

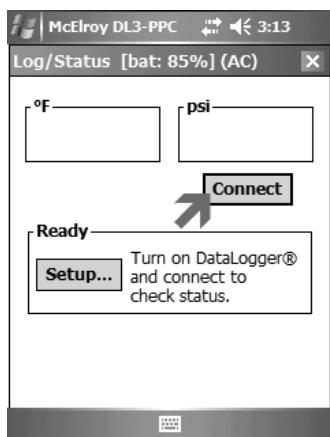

PH03388-10-24-06

Connect to DataLogger®

Tap **Connect**

Turn on DataLogger and then tap **OK**

PH03389-10-24-06

PH03390-10-24-06

Setting up the Bluetooth® Radio (cont'd)

Verify connection and exit program

Verify that connection is established by checking pressure and temperature readings. Finally, tap **Disconn** and **X** to exit.

TX02675-10-31-06

Installing Printer Port (optional)

An Exttech thermal printer model S2500THS can be used with the McElroy DL3 DataLogger® via Bluetooth® interface.

Following are instructions for setting up the Recon X for Bluetooth printing.

Get to the Today screen by tapping **Start > Today**:

Access Bluetooth Menu

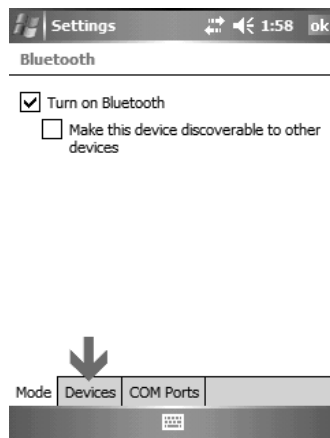

Tap the **Bluetooth** icon

Make sure Bluetooth is **On**. If not, tap on **Bluetooth** and then tap **Menu**

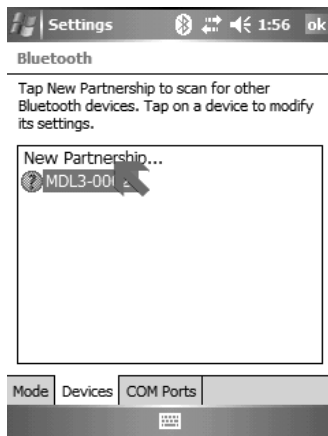

Installing Printer Port (optional) (cont'd)

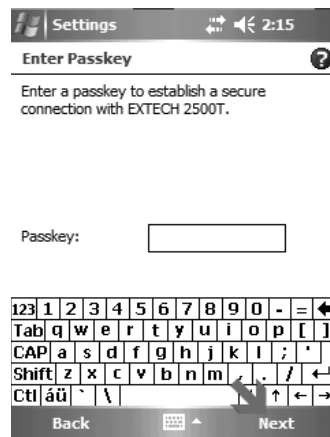

Access Bluetooth Settings
Tap **Bluetooth Settings**
Tap **Devices**

Prepare printer for partnership. Plug in printer power supply to make sure printer stays on.
Turn on printer, then tap **New Partnership...**
Wait for scanning of Bluetooth devices...

Setup partnership with printer
Tap on the **Extech printer** icon and then tap **Next**
Tap **Next**. You may be prompted several times for passkey, but just tap **Next**.

Installing Printer Port (optional) (cont'd)

Select serial port service

Tap **Serial Port** to select service and then tap **Finish**.

If keyboard is displayed, tap icon to close it.

PH03399-10-24-06

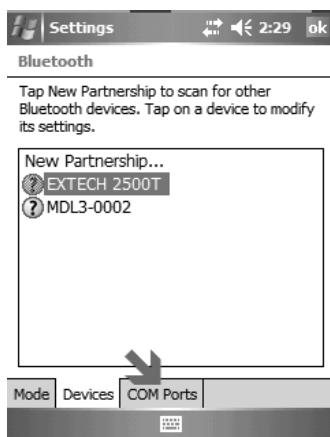

PH03400-10-24-06

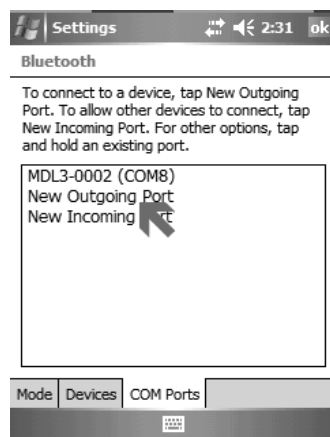

Prepare to setup COM port

Tap **COM Ports**

Tap **New Outgoing Port...**

PH03401-10-24-06

PH03402-10-24-06

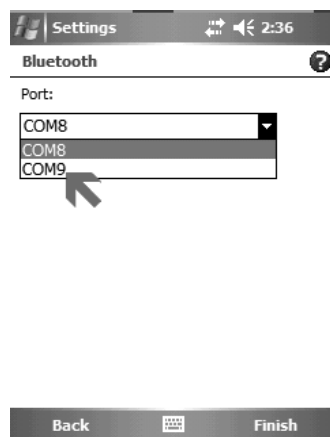

Setup COM port

Make sure EXTECH 2500T is selected then tap **Next**

Select **COM9**

PH03403-10-24-06

PH03404-10-24-06

Set-up Recon X

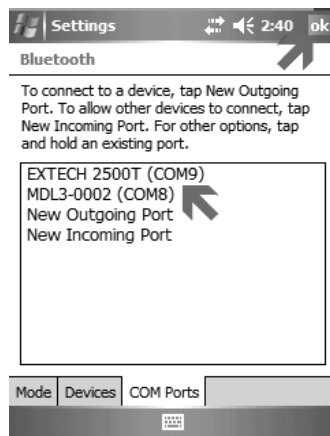

Installing Printer Port (optional) (cont'd)

Complete printer COM port setup

Uncheck **Secure Connection** then tap **Finish**.

Verify COM assignments then tap **OK**

Exit Bluetooth settings

Tap **X** to exit Bluetooth setting

TX02676-10-31-06

Software Updates

This section provides instructions for applying software update. This procedure will not cause loss of joint reports, however, it is always advisable to backup joint reports on a regular basis to a desktop PC hard drive and other media.

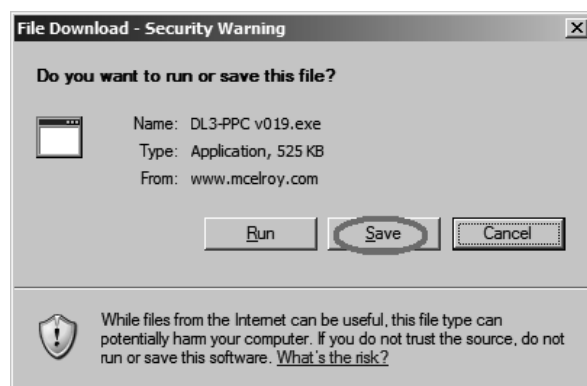

On the Recon X, make sure the DL3-PPC program is not running, by tapping **Start > McElroy > DL3-PPC**, then **Menu > Exit**.

Updates can be downloaded from: <http://www.mcelroy.com/fusion/support/downloads.htm>

Click on <http://www.mcelroy.com/fusion/support/downloads.htm> for the download page and click **DL3-PPC**:

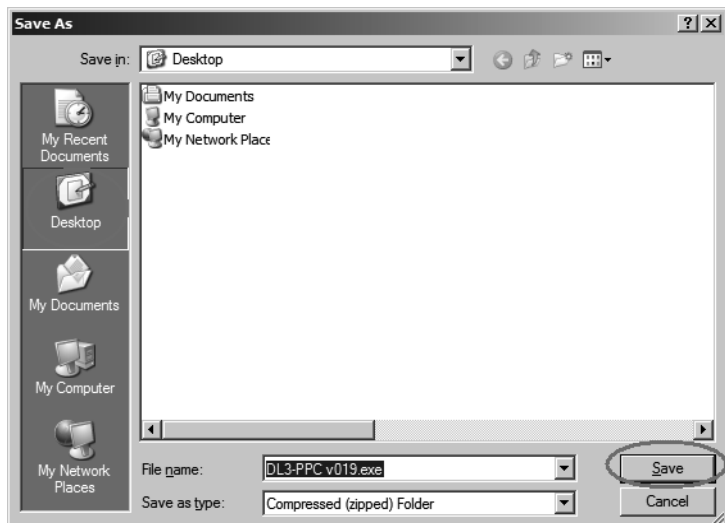

Click **Save**.

Software Updates (cont'd)

Choose to save the file to desktop.

PH03407-10-24-06

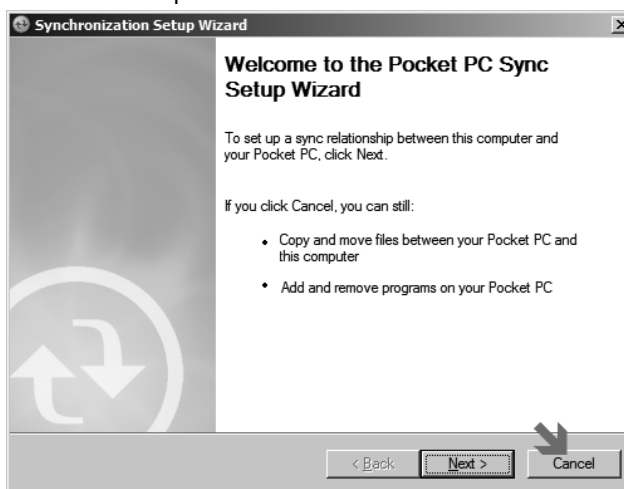

Make sure that ActiveSync is installed on your desktop computer before proceeding. If ActiveSync is installed, an icon will appear at the bottom of the desktop computer screen in the system tray to the left of the clock:

PH03405-10-24-06

NOTE: If ActiveSync is not installed, please refer to the first part of section III (Transferring the image file...) for installation instructions.

Connect USB cable between Recon X and desktop computer
ActiveSync displays the Synchronization Setup Wizard. Click **Cancel**.

PH03355-10-24-06

Once ActiveSync is connected, go to the PC desktop and double click on the setup icon:

PH03412-10-24-06

Follow the prompts on the PC screen and the Recon X screen for further details. Proceed with all default settings when asked, for example the folder in which to install to, and also overwrite existing program on the Recon X. TX02677-10-31-06

Set-up for Rugged Pocket PC (TDS Recon)

Special Instruction for Rugged Pocket PC (TDS Recon)

It is recommended that you install Microsoft ActiveSync on your Desktop or Notebook PC to use with your TDS Recon Pocket PC. Microsoft ActiveSync is used to copy joint reports to a PC from the TDS Recon built-in storage.

Please refer to the accompanying Microsoft and TDS documentation for installing and using Microsoft ActiveSync software.

The TDS Recon runs the same DL3-PPC program with minor differences described below:

- 1) Reset the Recon via key presses instead of the style. To soft reset (without deleting loaded programs), hold the power button for over 5 seconds. To hard reset (delete all settings and program, hold the power button and start button (the upward pointing arrow) for over 5 seconds.
- 2) Built-in storage instead of SD card for storing setup files and joint reports. The CompactFlash Card is called the Storage Card if viewed under File Explorer.
- 3) The system restoration file is "Recon vXXX" under the "Pocket PC Setup Files" folder in the CompactFlash Storage Card or built-in storage.

Copying Joint Reports

- 1) Make sure Microsoft ActiveSync is installed on your PC.
- 2) Make sure the TDS Recon has sufficient battery charge or use the AC adapter.
- 3) Connect USB cable between TDS Recon and your PC.
- 4) Your PC will recognize and configure itself to communicate with the Recon
- 5) Once the communication is established, a "New Partnership" dialog box appears on your PC screen. Click "Cancel" to skip the Partnership.
- 6) A "Partnership Not Set Up" dialog box appears asking for confirmation. Click "OK" to connect as "Guest".
- 7) The ActiveSync window shows "Guest" on the left-hand side and a green icon with two arrows on the right-hand side indicating communication established.
- 8) Click on the "Explore" icon on the PC. A Window opens showing files and folders on the Recon.
- 9) Find the Joint Reports folder under the My Documents folder. You may copy the entire folder to your PC's "My Document" folder.
- 10) Similarly, you may navigate to the Storage Card and find the duplicate joint report folder.
- 11) Check to make sure all the reports are copied to your PC and you may then delete the reports from the Pocket PC internal storage and Storage Card.

TX02543-4-17-06

Usage and Care

DataLogger®

The DataLogger® serves to record heater temperature and carriage pressure; logging data during the fusion process. It communicates wirelessly with the Pocket PC, uploading the data automatically when the fusion is complete. The unit houses an infrared sensor, two lasers, the **Log** push button, a battery pack and solid-state electronics.

Lasers

Two lasers, mounted in the top of the unit are used to indicate the area being sensed by the temperature sensor. To record the heater temperature, point the top of the unit at the coated butt plate. Pushing the **Log** button will turn on the lasers and the IR sensor will transmit its reading to the Pocket PC. Do not look into the laser beams or point them at anyone. Adjust the distance from the heater butt plate to the sensor until the points merge into one (approximately 4 inches). The sensor has an operating range from 250 to 550 deg. The sensor is not calibrated for uncoated heaters. Readings taken on uncoated heaters will not be correct. Take the heater temperature with a pyrometer and type the reading into the Pocket PC manually.

Batteries

The unit is powered by two D-cell batteries. When the lights dim, or communication becomes erratic replace them. Do not replace them during logging. Changing the batteries will not affect data previously collected.

IR Sensor

The infrared sensor is located in the center hole on top of the unit between the lasers. Dirt or water in this hole will make the sensor read incorrectly. Keep it clean with alcohol on a Q-tip.

Transducer cord

The coiled cord, which connects the pressure transducer to the unit, has screw connectors on both ends. If the cord is damaged it is easily replaced by unscrewing both ends and installing a new cord.

Quick Disconnect

This DataLogger® uses an improved quick disconnect on the pressure transducer. It is designed to seal reliably but not trap pressure in the line. It can be connected under pressure if necessary. To use this unit on older fusion machines you will need Fusion Machine Adapter Kit ADL6001. Remove the QD and fittings on the carriage manifold TX1 port and replace them with the elbow and QD in the kit.

Pressure Transducer

The pressure transducer is calibrated at McElroy Manufacturing, Inc. Its calibration should be checked annually to maintain factory quality.

Storage

Take the batteries out of the DataLogger®, Pocket PC and optional printer if storing for long periods of time. Battery storage temperature is 40°F to 104°F (4°C to 40°C). Do not store a fully charged battery at temperatures greater than 104°F (40°C) for long periods of time – the batteries may permanently lose charge capacity.

No Maintenance Inside Case

NOTICE: There are no parts inside the DataLogger™ that can be repaired by the user. Do not try to open the case. Any attempt to open the case can affect the weatherproofing and can damage the unit.

Specifications

McElroy DataLogger®

Batteries:	2x D-Cell Batteries Alkaline Ni-Cad Rechargeable Ni-mH Rechargeable
Operating Life:	Approx 48hrs Alkaline Batteries will last longer than Rechargeable
Shelf Life:	The Datalogger batteries will very slowly drain if left inside the Datalogger battery holder, and this may lead to leakage of corrosive battery chemicals after months of storage.
Operating Temp:	-4 to 158 degrees Fahrenheit (-20 to 70 degrees Celsius)
Lasers:	2x Peak Wavelength: 670nm Output Power: <1mW (Class II)
Wireless Link:	Bluetooth Version 1.1 Level: 4 dBm Range: ~30m (~100ft) Bluetooth Protocols: RFCOMM, L2CAP, SDP Supported Profiles: General Access Profile - Serial Port Profile
Pressure Probe:	Range: 0 – 2000PSI Accuracy: Calibrated to +/- 5PSI across entire range
Temperature Probe:	Calibrated Range: 400 – 550 Degrees Fahrenheit Accuracy: Calibrated to +/- 5°F across calibrated range Probe will attempt to measure temperatures as low as 50°F and as high as 700°F, but no guarantees are made concerning the accuracy outside of the calibrated range.
Data Sampling Rate:	10 samples per second
Pocket PC Specifications:	Refer to manufacturer's manual.
Software Updates:	Available online at http://www.mcelroy.com/fusion/support/downloads.htm

About this manual . . .

McElroy Manufacturing continually strives to give customers the best quality products available. This manual is printed with materials made for durable applications and harsh environments.

This manual is waterproof, tear resistant, grease resistant, abrasion resistant and the bonding quality of the printing ensures a readable, durable product.

The material does not contain any cellulose based materials and does not contribute to the harvesting of our forests, or ozone-depleting constituents. This manual can be safely disposed of in a landfill and will not leach into ground water.
